# Our Quality

AZ-Translation ensures the quality of the translated content.  
We provide top quality translations to maintain our customer satisfaction.

**To make sure that we are providing platinum quality, we rely on the following process:**

- Quality Assurance is a key component of any translation management system. Our QA process allows delivering excellent translations while continuously improving the overall quality.
- The entire review process is completely transparent to the client. Although clients don't need to assist in the QA process, they can view it and participate. For example, if the translator and reviewer are discussing the best writing style, the client may help by explaining about the target audience.
- Creating and managing Glossary, Style Guide, and TM assets to ensure consistency of effort and good results.
- Linguistic testing: ensuring your website or software maintains linguistic quality via a post-build review.
- Even the best translators can sometime make mistakes. That is a part of any human-driven process. We have developed strong reviewing phase to find mistakes, correct them and verify that translations are right. The issue tracking system guarantees that everything that needs fixing is fixed.

## **We chose our stuff carefully**

Our teams have the in-depth knowledge to help you achieve fast, high-quality localization as we choose our linguists, reviewers, QA specialists, DTP specialists, engineers, web developers, testers, and management team cautiously.

We have an in-house team as well as partners who we have picked carefully via a strong phase of testing and approving.

## **We are geeks**

The technology plays a unique role in the industry.  
Our team develops integrated solutions using the best technology out there.
